**CSE 260: Digital Logic Design**  
**SET- A**

1. [CO2] Consider the following boolean equation and answer the following questions,  $F(A,B,C) = AB'C' + AB + (BC)'A$ 
  - a. Simplify the boolean expression using boolean algebra (5 Marks)
  - b. Draw the simplified expression using NOR gate only (3 Marks)
2. [CO2] (6 + 1 Marks) Convert the following equation to its canonical SOP form and find the maxterms,  $F(a,b,c,d) = a'b' + b'c' + ac'$   
Note: You can not simplify this equation
